

Mert Hidayetoğlu

PhD Candidate

hidayet2@illinois.edu

Education

University of Illinois at Urbana-Champaign

Electrical and Computer Engineering

Doctor of Philosophy, 2022 (expected)

Advisors: Weng Cho Chew and Wen-mei Hwu

Computational Science and Engineering Concentration

Bilkent University

Electrical and Electronics Engineering

Master of Science, April 2015

Advisors: Levent Gürel and Ömer İlday

Bachelor of Science, January 2013

Research Interests

Parallel Processing, Fast Algorithms, Inverse Problems, Supercomputing

Technical Skills & Experience

Programming

C/C++, CUDA, MPI, MATLAB, Python, OpenMP, Fortran, Java, and VHDL

CAD & Simulation

AirSim, NX, Solidworks, I-DEAS, CATIA, and SPICE

Supercomputing

NCSA Blue Waters (500k node-hours), ALCF Theta (250k node-hours), OLCF Summit (20k node-hours), TACC Frontera (11k node-hours), as well as HPC cloud (e.g., Microsoft Azure).

Work Experience

08/2015 – present

Research Assistant, Coordinated Science Laboratory

Location

Urbana, IL

- Performance optimizations for sparse/irregular computations on GPUs
- Design and implementation of memory-centric algorithm on 3D X-ray tomography (with scaling up to 4,096 KNLs – 256k cores – and 24,576 GPUs)
- Participation in MIT/Amazon/IEEE Graph Challenge (2020 Champion) [\[Link\]](#)
- Efficient GPU algorithms for sparse deep neural network inference with big models
- Heterogeneous and out-of-core algorithms for large-scale applications
- Thesis work on hierarchical communications for distributed sparse matrix multiplication (reduces inter-node communication volume by 60%)

08/2015 – 05/2019

Research Assistant, Electrical and Computer Engineering Department

Urbana, IL

- Fast and parallel algorithms for scattering problems
- Design and implementation of massively-parallel inverse multiple-scattering imaging (scaling up to 4,096 GPUs)
- Deployment of large-scale distributed linear and nonlinear optimization methods
- Fast spectral techniques & parallelization for 2.5-dimensional modeling

05/2019 – 08/2019

Research Intern, IBM T. J. Watson Research Center

Cambridge, MA

- Optimization of HPCG benchmark on OLCF Summit
- Data centric systems and high-performance computing group

05/2018 – 08/2018

Givens Associate, Argonne National Laboratory

Lemont, IL

- Supercomputing solutions for ptycho-tomographic imaging
- Data science and learning (DSL) and X-ray science (XSD) divisions

07/2016 – 08/2016

Research Assistant, The University of Hong Kong

Hong Kong S.A.R., China

- On-site collaboration with computational electromagnetics group

08/2012 – 08/2015

Co-Founder & Staff, ABAKUS Computing Technologies

Ankara, Turkey

- Conducting industry- and government-funded research projects
- Organization of CEM'15 Computational Electromagnetics Workshop
- *See other duties under BiLCEM*

İzmir, Turkey

12/2010 – 10/2014

Research Assistant, Computational Electromagnetics Research Center (BiLCEM)

Ankara, Turkey

- Development of novel and parallel out-of-core electromagnetics solvers
- Accurate and fast solutions of large-scale electromagnetics problems
- Implementation of iterative solvers and preconditioners for solutions of extremely-large dense linear systems (up to $N = 2.1$ billion unknowns!)
- Assistant in CEM'13 Computational Electromagnetics Workshop

İzmir, Turkey

06/2011 – 09/2011	<i>Summer Intern, BiLCEM</i> <ul style="list-style-type: none"> Development of a parallel mesh refinement code for large-scale geometries Assistant in CEM'11 Computational Electromagnetics Workshop 	Ankara, Turkey İzmir, Turkey
